Summary

Computer Science student passionate about building innovative and impactful solutions. Experienced in organizing and promoting successful technical events. Proficient in Java, HTML, CSS, JavaScript, React, and Node.js, with a strong foundation built through hands-on projects and online courses. A collaborative team player eager to contribute to meaningful projects and grow by learning from experienced professionals.

Skills

Programming Languages

Java, JavaScript (Basic)

Frontend Technologies

ReactJS, HTML, CSS

Backend & Database Technologies

NodeJS, ExpressJS, SQL (Oracle), MongoDB

Other Tools/Technologies

Git, Postman API, Figma, Canva

Projects

Gas Booking Alert Message And LPG Leakage Detection Using IOT 🔗

Developed an LPG leak detection system using Raspberry Pi Pico and gas sensors. Integrated with a mobile app for real-time gas level monitoring. Alerts users on leaks and enables quick gas refill booking.

Pet Care Appointment Management System (Frontend & Backend) 🔗

Built a responsive pet care appointment system with HTML, CSS, and JavaScript. Implemented backend for authentication and scheduling. Used secure APIs for smooth data flow and efficient service management.

User-Friendly Banking Web Application 🔗

Developed a responsive banking web app using HTML, CSS, and JavaScript. Enabled seamless user experience across devices with intuitive UI. Key features: account management, fund transfers, and transaction history.

Education

B.Tech in Computer Science and Engineering, *Vellore Institute of Technology-AP* 09/2022 – Present

Intermediate, *Aditya Junior College-AP* 07/2020 – 05/2022

Experiences

InAmigos Foundation, *Content Writer* 🔗 06/2025 – 07/2025

Created impactful content for blogs, social media, and outreach campaigns on community awareness. Collaborated with the media team to enhance clarity and engagement. Learned SEO fundamentals and non-profit storytelling techniques.

Certificates

MERN Full Stack By Ethnus 🔗
